ENLITIC AND MLP CARE COOPERATE TO DEVELOP CLINICAL AI MODELS TO BE USED IN TURKEY AND NEIGHBORING COUNTRIES

Within the scope of cooperation, by using U.S. based Enlitic's artificial intelligence software technology, deep learning models will be developed, trained, and validated together with MLP Care, for many foreign patients applying to MLP Care's hospitals to receive advanced health care services as well as domestic patients. Along with Turkey, clinical artificial intelligence models will be available in healthcare institutions operating in Eastern Europe and Central Asia. Moreover, in order to develop clinical artificial intelligence models and successfully integrate them into healthcare system of the targeted region, an Artificial Intelligence Center of Excellence will be established in Turkey.

Enlitic Inc., the world's leading artificial intelligence (AI) software developer, and MLP Care, one of the largest private healthcare providers in Turkey together with its Medical Park and Liv Hospital brands, today announced a multi-faceted strategic partnership in the field of clinical AI. The US-based Enlitic develops artificial intelligence software that works as a decision support system for doctors and helps them diagnose their patients faster and more accurately. Within the scope of the cooperation of the two institutions, deep learning models will be developed, trained and validated by using Enlitic's artificial intelligence software technology for many foreign patients applying to MLP Care's hospitals for advanced healthcare services as well as domestic patients. With the integration of the developed artificial intelligence models, imaging and diagnostic stages will be accelerated, and the processes will be comprehensive and with minimum error.

The artificial intelligence models, which will be used primarily in the MLP Care hospitals, will be integrated into the healthcare systems of many countries in Eastern Europe and Central Asia in the upcoming periods.

ARTIFICIAL INTELLIGENCE CENTER OF EXCELLENCE WILL BE ESTABLISHED

As part of the agreement between Enlitic and MLP Care, an Artificial Intelligence Center of Excellence will be established in order to develop artificial intelligence models and facilitate learning processes. The Artificial Intelligence Center of Excellence, which will also include a GPU (graphics processing unit) data center, will be staffed by experts in data science and engineering. The center, the first-of-its-kind not only in Turkey but also in Eastern Europe and Central Asia, will mark a significant step to use and to integrate AI into a global healthcare system through developed models.

Enlitic's partnership with MLP Care adds to the company's ever-growing list of world renown leading healthcare and technology companies, including Capitol Health, a leading Australian

healthcare provider; Marubeni Corporation, a Japan-based global conglomerate; Konica Minolta, a leading multi-national technology company also based in Japan; and HealthCare Solutions, owner of world-class cancer centers across the U.S.

“We look forward to further increase the quality of our healthcare services, medical education, and medical research and development by leveraging Enlitic's advanced technology,” said Dr. Muharrem Usta, President and Chief Executive Officer of MLP Care. “Enlitic’s best-in-class deep learning models and our jointly developed AI center of excellence will enable us to step up our existing advanced clinical capabilities and scale our operations in Europe and Central Asia.”

MLP Care is a leading healthcare provider benefiting from the most advanced technologies to improve patient care and we are excited to agree upon a strategic partnership with such company to develop AI,” said Kevin Lyman, Enlitic’s Chief Executive Officer. “Our partnership, including the development of our AI center of excellence, will undoubtedly level-up healthcare services, bolster our core offering, and enhance our footprint in the region.”

About MLP Care

Founded in 1993, MLP Sağlık Hizmetleri A.Ş. (MLP Care) continue its operations with its Medical Park and Liv Hospital brands as well as VM Medical Park concept. As the largest private healthcare service provider in Turkey, MLP Care currently operates 31 hospitals in 17 cities across the country. Having selected as one of the most valuable 100 brands of Turkey, MLP Care, considered as one of the institutions that shape the healthcare sector with its innovative technology, specialist physicians, and more than 20 thousand employees.

About Enlitic

Named one of the world’s “50 Smartest Companies” by MIT Technology Review, Enlitic is a pioneer in medical deep learning, building a best-in-class platform that connects human and artificial intelligence to save time, money, and most importantly, lives. The company’s team of practicing radiologists, data scientists, and software engineers analyse a vast stream of healthcare data — including millions of clinical cases from cross-sector healthcare partners — to improve diagnostic accuracy, speed, and patient outcomes, as well as to accelerate pharmaceutical research and drug trials. Enlitic is based in San Francisco and has offices in New York and Sydney, Australia.
